

Single Stock Fund

Non-SARSS

Objective

Objective: To identify the effect of Single Stock Fund on Non-SARSS systems.

Standard: The student will be able to answer questions relating to Non-SARSS system behavior under SSF when questioned by the instructor.

The SSF ESC Decision

SSF Executive Steering Committee approved excluding from the SSF the NAMI which are managed by systems other than the Standard Army Retail Supply System and the Army Materiel Command Installation Supply System.

Impacts:

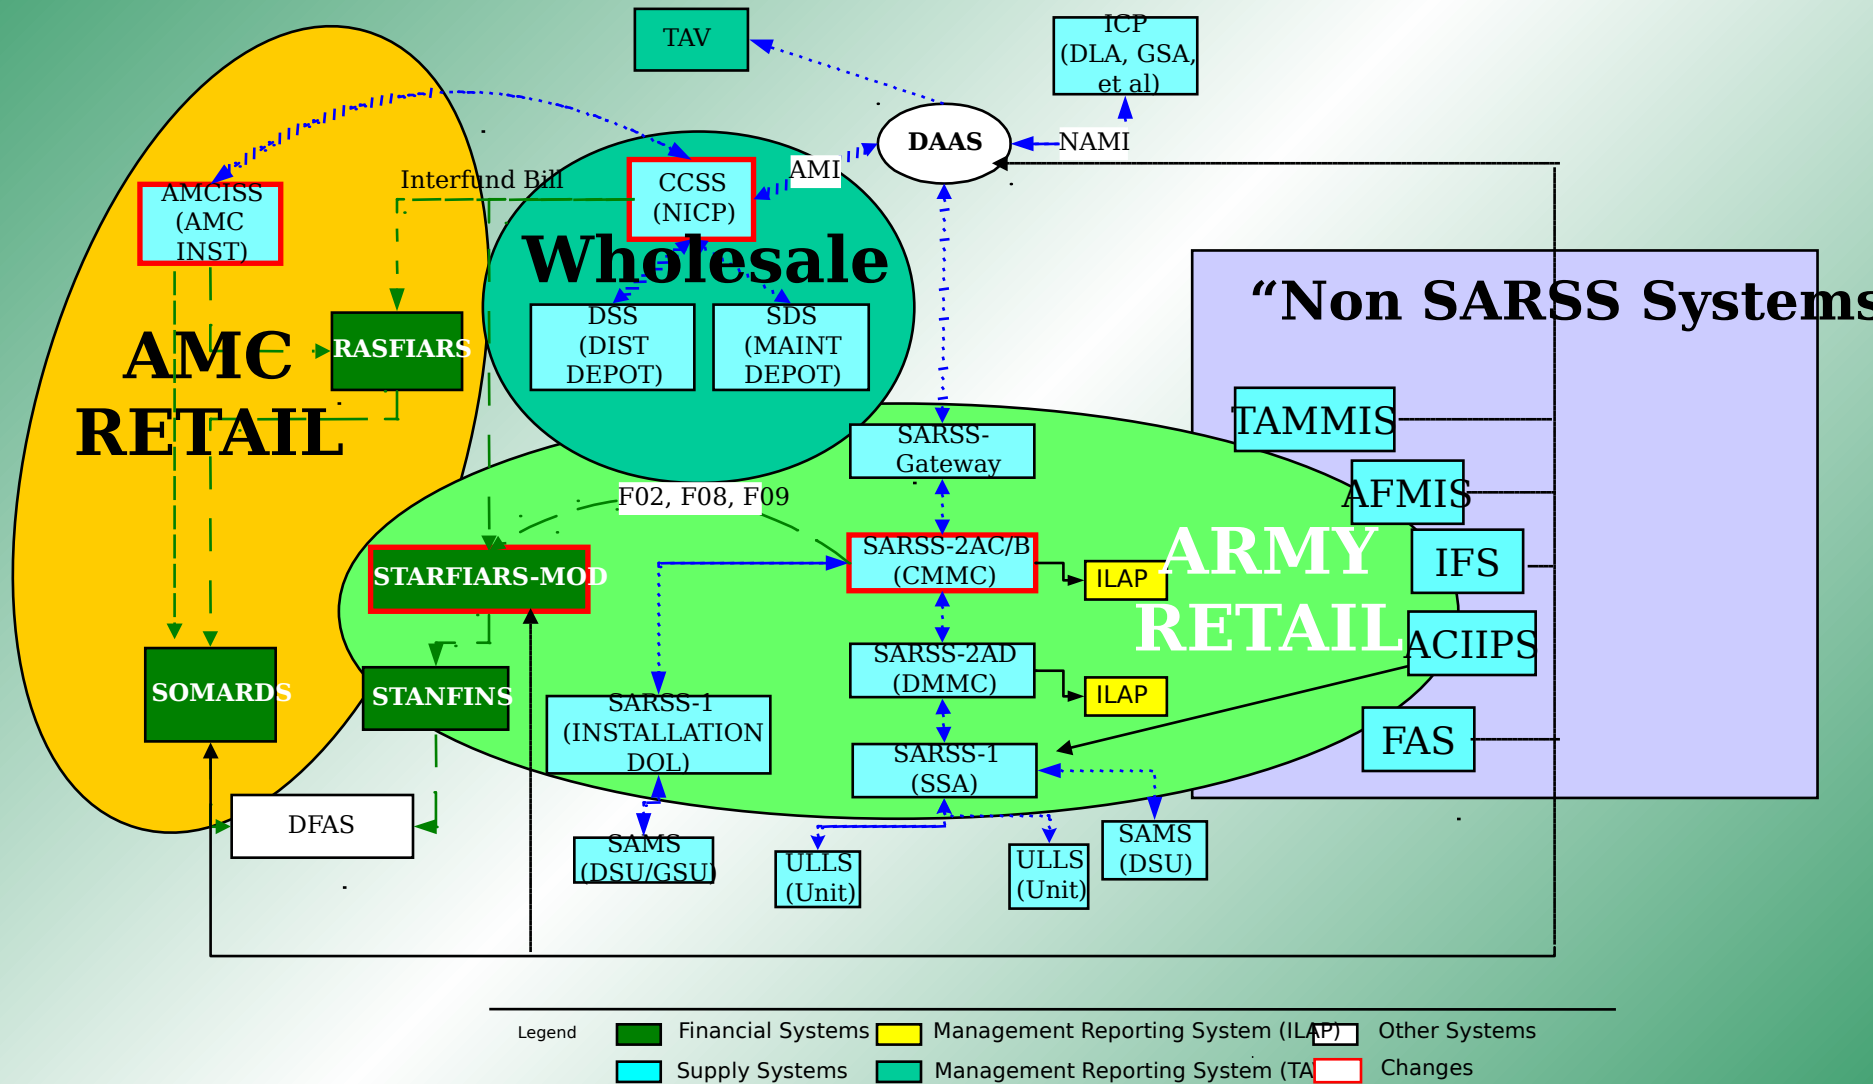

Conversion of affected systems to ensure:

- Requisitions flow to appropriate source of supply
- Source of supply can bill direct to customers

What's Affected:

- Class I Army Food Management Information System (AFMIS)
- Class II Army Clothing Initial Issue Point System (ACIIPS)
- Class III Fuels Automated System (FAS)
- Class IV Integrated Facilities System (IFS)
- Class VIII Theater Army Medical Management Information System (TAMMIS)

Today's System Architecture

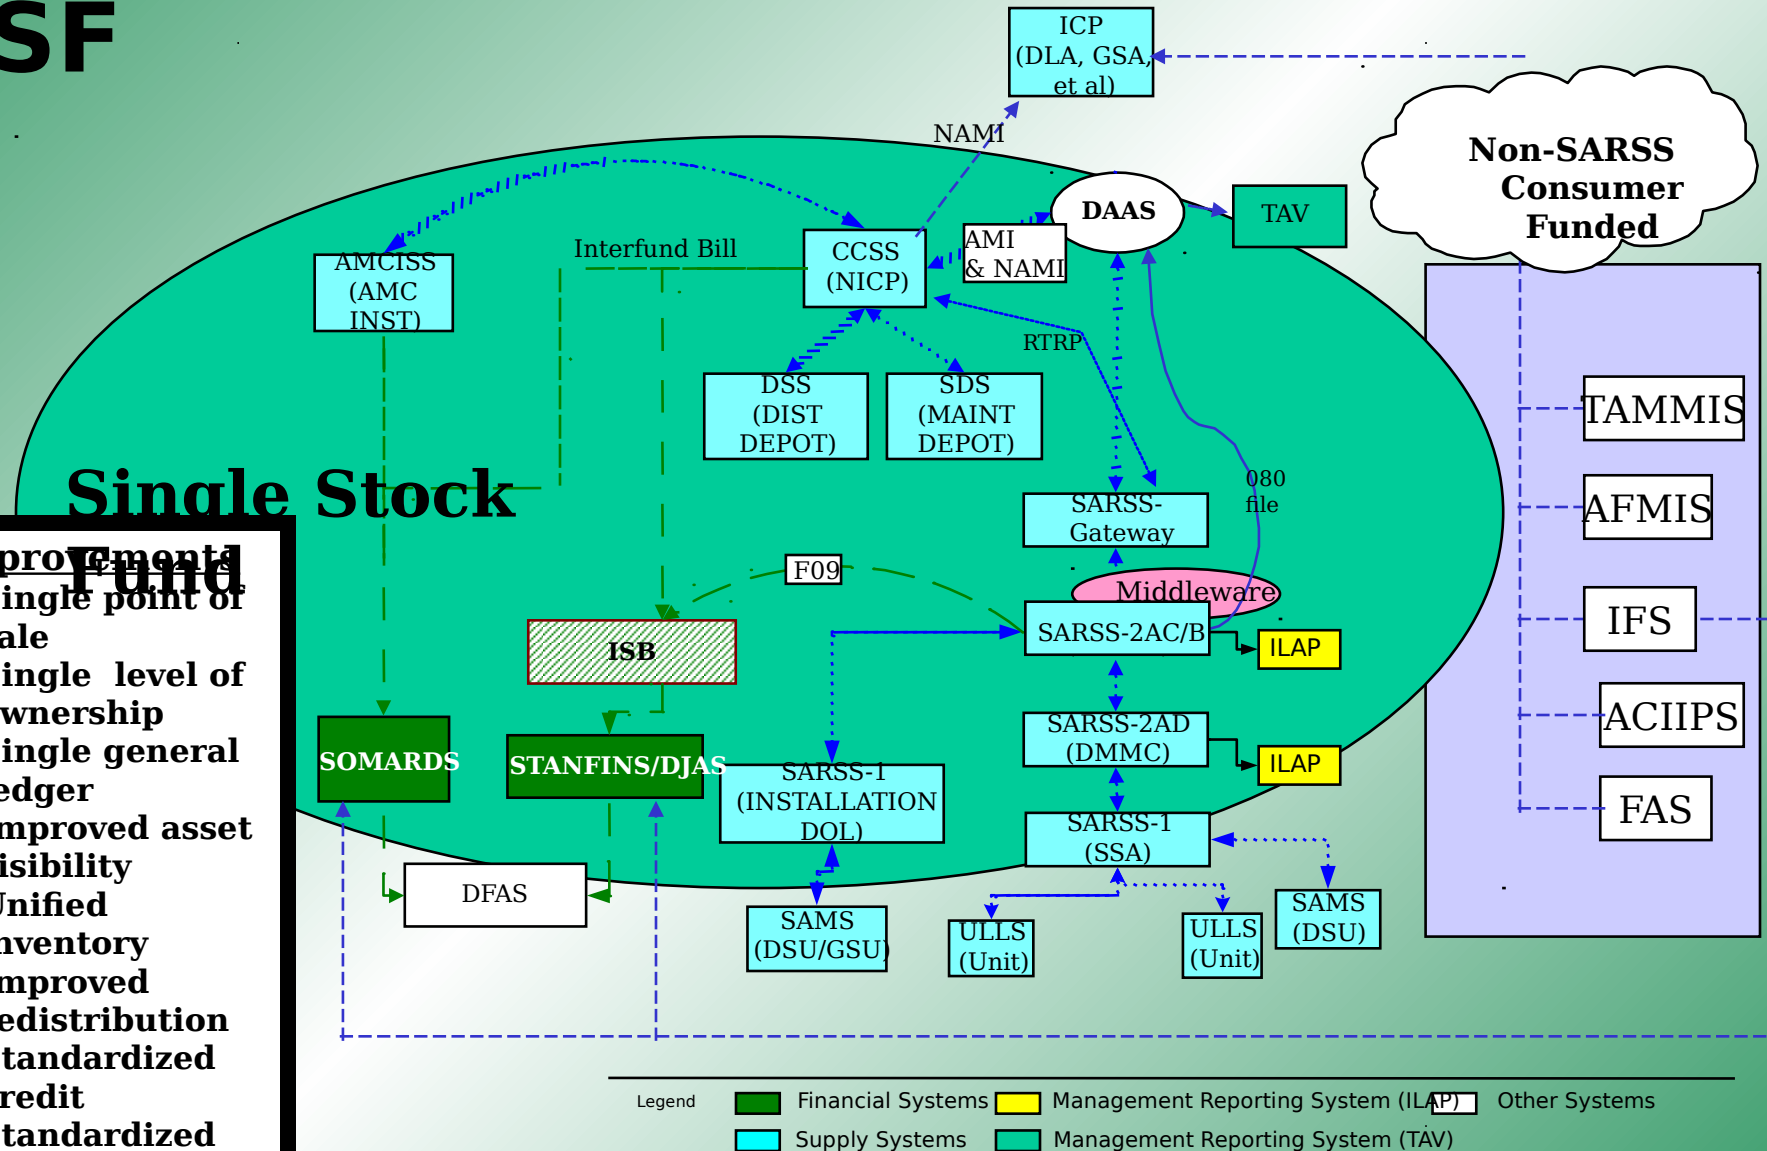

Interim System Architecture with SSF

Improvements

- Single point of sale
- Single level of ownership
- Single general ledger
- Improved asset visibility
- Unified inventory
- Improved redistribution
- Standardized credit
- Standardized business practices

- Milestone 1 & 2 Implementation requirements
- Training

Significant Implementing Actions

- **DA DCSLOG message announcing decision, providing guidance 21 Jul 99**
- **DA ODCSLOG Memo, requesting DLA support 6 Aug 99**
- **DA ODCSLOG Memo to system proponents: 31 Aug 99**
 - Take necessary automation actions
 - Reiterated attrition guidance
 - Absorb Systems Costs, identify any un-funded issues via Command Channels
- **SSF PMO hosted monthly session with DLA, DFAS & Systems Proponents**
 - Proponents briefed strategy
 - Financial interface meeting

Systems Specific Updates

Systems Specifics

- **ACIIPS (Clothing)**
- **AFMIS (Food)**
- **FAS (Fuels)**
- **IFS (Engineer-Installation Facilities)**
- **TAMMIS (Medical)**

Items to be Covered

**Description
Schedule
Synopsis/Status**

Army Clothing Initial Issue Point (ACIIPS)

Functional Description

- Issue AWCF clothing inventory to recruits
- \$25-35M Inventory Value (FY99)
- 5 CIIPs (Ft's Benning, Jackson, Knox, Sill, L. Wood)
- Bill/Credit customer accounts

Actions

- Transfer to DLA
 - Minimize inventory
 - Phase transfer by installation - In process
- Estimated residual inventory value- \$ 20.8M

Army Food Management Information System (AFMIS)

Functional Description

- Automated system to order, receipt, inventory and financially manage Class I at installation level
- \$454M (FY99 DLA Sales)
- 54 AC locations - 337 dining facilities
- Prime Vendor subsistence direct to dining facilities; DLA supplies operational rations

Actions

- Minimize inventory at installations -in process
- Pay for subsistence with special open allotment
- Transfer 26M Op projects MRE to DLA
- DLA exercises just-in-time delivery of operational rations

• Demo solutions implemented

Fuels Automated System (FAS)

Functional Description

- System proponent is Defense Energy Support Center (DESC)
- PBD 735 directed DLA to manage bulk fuels (1991)
- FAS to be fielded at all Army installations & NGB locations

Accomplishments to Date

- 93 Sites have been capitalized to date
- Met Milestone 1&2 SSF Implementation Schedule
- Successfully sending transactions into the Army

legacy systems

Actions

- Capitalize EUSA and FORSCOM Sites
- Finish testing and implement FAS Enterprise Server

Integrated Facilities System (IFS)

Functional Description

- Real Property Facility Management and Supply (IFS) being replaced by Engineer Supply 2000
- \$20M Inventory Value (FY99)
- Seasonal stock (ice melt, etc., on hand)
- Standby stock for mission essential & life safety equipment

Actions

- Completing IFS-STANFINS interface
- Transfer inventory to consumer funds - on track
- Estimated residual inventory value: \$16M - Hazardous materiel, stand by and seasonal stock

Theater Medical Management Information System (TAMMIS)

Functional Description

- **Manages CL VIII medical materiel (installation, division, corps and theater ASL) Army-wide**
- **Supports deployable hospitals, division medical supply offices and Corps medical logistics battalions**
- **Estimated \$30-35M Inventory Value**
- **Annual sales- \$550M at 36 AWCF sites**

Actions

- **DCSLOG/OTSG/DLA MOU signed 1 June 00**
- **DLA - Army: 19 AWCF sites to transition to DWWCF; remainder to O&M/Defense Health Program buy-out**
- **Risk assessment performed--Completed TRADOC and FORSCOM; remainder to transition 60-90 days in advance of SSF Conversion**
- **Estimated residual inventory value approximately - \$35M**

Inventory Summary

Residual
Estimated

Plan
Proposed

<u>ACIIPS</u> Army Clothing Initial Issue Point System	\$21M (Clothing)	Transfer to DLA Defense Working Capital Fund (DWCF)
<u>AFMIS</u> Army Food Management Information System	\$26.5M DWCF (Subsistence)	Transfer to DWCF
<u>FAS</u> Fuels Automated System	Approx: \$1 Mil (Bulk Petroleum)	Transfer to DLA (DWCF) (OSD directed DLA fuel management Dec 91)
<u>IFS</u> Integrated Facilities System	\$16M (Engineer/ Construction) materiel)	Transfer to consumer funded activities (GSA/DLA standard commercial items)
<u>TAMMIS</u> Theater Army Medical Mgt Info System	\$30-35M (Medical materiel) *(Redstone Arsenal: \$31K)	Transfer to DLA (DWCF) (Redstone Arsenal Inventory to Defense Health Program O&M Activity)

Summary

- **ACIIPS, AFMIS, FAS and IFS on track with ESC guidance for exclusion from AWCF-SMA**
- **TAMMIS moving to meet Milestone 1 and 2 timeframes**
- **Need the entire community - MACOMs, ARSTAF, Secretariat, DLA, DFAS and SSF PMO - partnering to make this happen**
